| • T-SQL          | • PayPal               |
| • ActionScript   |                        |

### REPRESENTATIVE PROJECT EXPERIENCE

---

#### **Apartment Complex Management:**

A C# application using ASP.NET MVC, entity framework, code first migrations, and a PayPal integration that provides an apartment complex a streamlined process to create cases for potential tenants and allow current residents to pay their rent online.

#### **Greenlight Ecommerce Shop:**

A C# application using ASP.NET MVC, entity framework, code first migrations and PayPal API integration that offers an alternative to Steam's Greenlight Service where developers upload demo files and only authorized are allowed to purchase complete games.

**Lemonade Stand:**

A game developed in Python that takes changes each round with the probability of weather, decaying supplies, and character classes that have changing taste preferences. All of these determine how successful you become between each round. Players have the option to play against an aggressive AI that simulates a real-life experience when opening a new business.

**Natural Language Processing (NLP):**

A Python application that scraps Wikipedia based on a user query, converts all of the data into tokens using the Gensim package, filtering excess or unwanted information and displays it on an HTML page created using the Flask framework.

**PROFESSIONAL EXPERIENCE**

---

**GameStop**, Rolling Meadows, IL
